Contents

1 Introduction **5**

2 Installation **7**

1 Introduction

This is an introduction to using the dlrbook document class with LyX. Please see the dlrtext documentation for using the DLR layouts with plain LaTeX. This feature is experimental, so please check back often to retrieve updates.

2 Installation

To install the LyX layout files, follow these steps:

1. Locate your LyX UserDir using the LyX menu: "Help/About LyX".
2. Copy the contents of RM_LaTeX's /lyx folder to your UserDir.
3. Run LyX's "Tools/Reconfigure". LyX will now find the new configuration files.
4. Restart LyX, as to make the new layout files available.
5. You're done.
