Knowledge for Tomorrow

# Motivation

➤ Do we really need to motivate a great beamer theme?!

# Outline

1. Motivation

2. DLR Theme Usage

3. Examples

# DLR Theme Usage

- Load the beamer class and the DLR theme:

```
\documentclass{beamer}  
\usetheme{dlr}
```

- This will load the current DLR slide layout

- Note:

- Use `\usetheme[professionalfonts]{dlr}` to use the default LaTeX math fonts.
- Use `\usetheme[helvetica]{dlr}` to use Helvetica instead of Frutiger.
- To use the old template use `\usetheme{dlr_2008}`.

- For this document, an additional color theme is used: `\usecolortheme{orchid}`.

- The theme is subject to change, as e.g. fonts will be adapted to the PPT template etc..!

- For more information: See the beamer documentation at

[http://www.tex.ac.uk/CTAN/macros/latex/contrib/beamer/doc/  
beameruserguide.pdf](http://www.tex.ac.uk/CTAN/macros/latex/contrib/beamer/doc/beameruserguide.pdf)

- The package beamertools is loaded with DLR beamer:

- To avoid the loading of beamertools use `\usetheme[nobeamertools]{dlr}`
- To access beamertools options use `\usetheme[beamertools={...}]{dlr}`

# Additional Logo

- You can add an additional logo next to the DLR Eagle
- Use `\addlogoFL{xxx}` to add some content right of the DLR Eagle in the footline
- Use `\addlogoTP{xxx}` to add some content right of the DLR Eagle on the title page
- You can use `\addlogoFL*{xxx}` and `\addlogoTP*{xxx}` to directly add some TikZ code. The node (DLReagleTP) and (DLReagleTP) refers to the DLR Eagle in the footline and title page, respectively.

# Example Frame with Blocks and Equations

## Normal Block

- Foo
- Bar

## Alert Block

- Foo
- Bar

## Example Block

- Foo
- Bar

## Equation

$$\sqrt{a^2 + b^2} = c$$
