

# The jobpath package

Andreas Klöckner

September 25, 2013

## 1 Usage

Simply load the package via `\usepackage{jobpath}`. It will then provide the following commands.

- `\jobpath` to include only the path:  
I:/Reports/05.RM\_Latex/tools
- `\jobpathname` to include the main input file together with its path:  
I:/Reports/05.RM\_Latex/tools/jobpath
- `\jobpathfile` to include the main input file:  
jobpath

Be aware, that `\jobpathfile` may differ from `\jobname`, if you use the `jobname` option on `latex` executable.
